1. Claims 1-25 are pending in the application and are currently under prosecution.
2. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
3. Claim 1 links inventions 1-2. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claims 1. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

**Group 1.** Claims 1-6 are drawn to a method for determining whether a subject has a pediatric neoplasm comprising assaying a diagnostic sample for Id2 protein expression, wherein detection of Id2 expression is diagnostic of a pediatric neoplasm classified in Class 435, subclass 7.1.

**Group 2.** Claims 1-4, 7-9 are drawn to a method for determining whether a subject has a pediatric neoplasm comprising assaying a diagnostic sample for Id2 mRNA expression, wherein detection of Id2 expression is diagnostic of a pediatric neoplasm classified in Class 435, subclass 6.

4. Claim 10 links inventions 3-4. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claims 10. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

**Group 3.** Claims 10-15 are drawn to a method for assessing the efficacy of therapy of a patient who has a pediatric neoplasm comprising assaying comprising assaying Id2 protein classified in Class 435, subclass 7.1.

**Group 4.** Claims 10-13, 16-18 are drawn to a method for assessing the efficacy of therapy of a patient who has a pediatric neoplasm comprising assaying Id2 mRNA classified in Class 435, subclass 6.

5. Claim 19 links inventions 5-6. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claims 19. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to

examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

**Group 5.** Claims 19-20 are drawn to a method for determining prognosis of a patient who has a pediatric neoplasm comprising assaying Id2 protein, as disclosed in the specification, classified in Class 435, subclass 7.1.

**Group 6.** Claims 19-20 are drawn to a method for determining prognosis of a patient who has a pediatric neoplasm comprising assaying Id2 mRNA, as disclosed in the specification, classified in Class 435, subclass 6.

6. Claim 21 links inventions 7-8. The restriction requirement among the linked inventions is subject to the nonallowance of the linking claim(s), claims 21. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application. Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory

and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

**Group 7.** Claims 21-24 are drawn to a method for treating a pediatric neoplasm comprising inhibiting Id2 protein with an Id2 protein inhibitor, as contemplated in the specification, classified in Class 424, subclass 130.1.

**Group 8.** Claims 21-25 are drawn to a method for treating a pediatric neoplasm comprising inhibiting Id2 mRNA with a nucleotide inhibitor classified in Class 536, subclass 23.1.

7. The inventions are distinct, each from the other because of the following reasons:

Inventions 1-8 are materially distinct methods which differ at least in objectives, method steps, reagents and/or dosages and/or schedules used, response variables, and criteria for success.

8. Because these inventions are distinct for the reasons given above have acquired a separate status in the art as shown by their different classification and/or recognized divergent subject matter, restriction for examination purposes as indicated is proper.

9. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R.

§ 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).

Art Unit: 1642

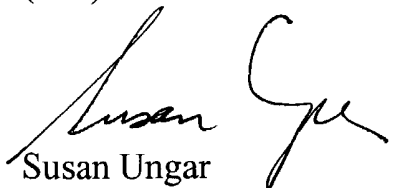

10. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. § 103, the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 C.F.R. § 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of potential 35 U.S.C. § 102(f) or (g) prior art under 35 U.S.C. § 103.

11. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
